MEMORANDUM FOR: Commanding Officer, Air Force Rocket Propulsion Laboratory,
Edwards Air Force Base, California

SUBJECT : Letter of Appreciation

1. In the early part of December a group of five NPIC imagery interpreters spent one day at your installation familiarizing themselves with rocket test facilities, propellant storage and handling facilities, propulsion research facilities, and propellant production research facilities at your base. Familiarization trips like this are of considerable importance in the development of imagery interpreters, and, as such, are of considerable interest to me.

2. Our people have reported that the trip to Edwards was most worthwhile and cited the excellence of the individual presentations, and the conscientious professionalism evident in all the arrangements made by your project officer, [REDACTED]

STAT

3. Please pass along our thanks to [REDACTED] and all the people who helped make this trip a success. We appreciate your hospitality as well as your willingness to support us in this important aspect of our training program.
